

## COMPANY OVERVIEW

Infogenic Solutions is headquartered in Peoria, IL.

As a Microsoft Partner, we provide software solutions and consulting services to help clients of all sizes collect, analyze, share, and use business critical information.

Cloud Computing  
SharePoint Solutions  
Custom Application Development  
Business Intelligence

Infogenic sells, customizes and implements solutions built upon Microsoft products, including SharePoint 2010, ASP.NET, Office, SQL Server and Cloud platforms. Infogenic is also expert at developing customized, stand-alone and integrated application solutions using the latest in technology and efficient processing techniques.

All of Infogenic's services assist clients in making technology work to help them run their businesses at peak efficiency. The ultimate mission of Infogenic is to relieve our clients of business process obstacles and technology issues. Our solutions free our clients to engage in additional critical business functions, such as planning for growth, to help them run their businesses at maximum profitability.

Let your business/ run.

Let your business/ run.

# We help leaders run their businesses

From Fortune 500 companies to small businesses and everything in between, Infogenic Solutions can provide IT Solutions to help you run your business more effectively.

## TECHNOLOGY

- ASP.NET
- OFFICE 365
- SQL SERVER
- SHAREPOINT

Infogenic Solutions specializes in software solutions and consulting services to help our clients of all sizes collect, analyze, share and use critical business information. As a Microsoft Partner, we customize and implement solutions built on Microsoft platforms, including SharePoint, ASP.NET, Office, SQL Server and Office 365.

## flexible solutions for your business needs

### OUR APPROACH

Infogenic Solutions takes a big picture approach to finding and implementing the right solutions for your business. We work together with our clients to first understand their business. We carefully identify and analyze your business processes, procedures and existing technologies.

Once we understand your business and your business needs, especially your information needs, we move forward with implementing the right combination of technology consulting services and software solutions that improve your business processes and let you run your business at peak efficiency.

We use a thorough discovery process to finding the technology solutions that will remove process obstacles for you. Those solutions let your business run the way it should, so you can let your business run the way you want it to—and in the process, freeing you to engage in other critical business functions, such as planning for the future.

### SHAREPOINT SOLUTIONS

SharePoint offers your business a centralized hub, where data and documents can be saved, exchanged, modified, or published. Its integrated platform will simplify data access and facilitate teamwork.

### BUSINESS INTELLIGENCE

With our high-performance BI solutions, we bring together disparate data sources to make your enterprise-wide information available in one handy, central location.

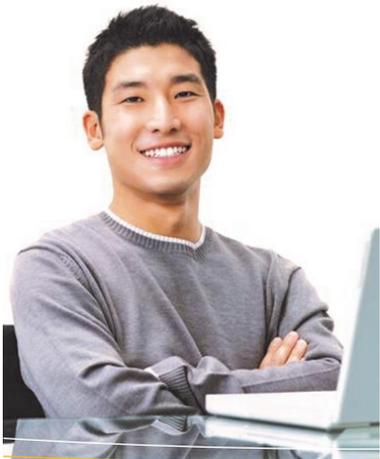

### CLOUD COMPUTING SOLUTIONS

By using Office 365, you get big-business tools at a small-business expense. That includes instant, around-the-clock availability to a robust suite of products, and the ability to synchronize documents between Office 365 and your workspaces.

### CUSTOM SOLUTIONS

We started as a custom applications development firm and our experience gives us the expertise needed to create customized solutions to integrate vastly different technologies seamlessly.
